Abdul Ahad

Data Engineer & AI/ML Developer | Microsoft Certified: Fabric Data Engineer Associate

+92 318 2459653 • ahadbuilds5@gmail.com • Sialkot, Pakistan

LinkedIn: linkedin.com/in/abdulahadbuilds • **Portfolio:** ahadbuilds.tech • **GitHub:** github.com/ahadbuilds

Professional Summary

Final-year Computer Science student at UET Lahore with hands-on experience in Data Engineering, Machine Learning, Data Science, and AI application development. Experienced in building data pipelines, developing machine learning models, analyzing data, and integrating AI solutions through APIs and analytical dashboards.

Technical Skills

- **Data Engineering:** Microsoft Fabric, PySpark, Lakehouses, Delta Lake, SQL
- **AI & Machine Learning:** Python, TensorFlow, Scikit-learn, Feature Engineering
- **Data Science & Analytics:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Power BI
- **Development & Tools:** FastAPI, React, Git, GitHub, Jupyter Notebook, VS Code

Projects

SMARTMINER - AI-Powered Data Mining & Predictive Analytics Platform

- Developed an end-to-end AI platform for automated data preprocessing, visualization, and predictive analytics.
- Built machine learning pipelines and REST APIs for model training and prediction.
- Designed an interactive dashboard for data analysis and intelligent reporting.

GitHub: github.com/ahadbuilds/smartminer-ai

Lung Segmentation from Chest X-Rays using Deep Learning

- Developed automated lung segmentation using **Classic U-Net and VGG16-based Transfer Learning**.
- Applied image preprocessing and data augmentation, achieving **95.6% Dice Score and 91.7% IoU**.
- Implemented **Grad-CAM** for model interpretability and visualization.

GitHub: github.com/ahadbuilds/lung-segmentation-cxr

CardioPulse AI - Clinical Risk Prediction & Analytics System

- Developed a **Random Forest** model using 918 clinical records, achieving **92% accuracy and 0.96 ROC-AUC**.
- Applied feature engineering and hyperparameter tuning to improve model performance.
- Built interactive **Power BI dashboards** for clinical risk analysis and visualization.

GitHub: github.com/ahadbuilds/CardioPulse-AI

Professional Experience

Freelance Web Developer ***June 2025 - Present***

Athleimax

- Developed and launched the Athleimax corporate website and the AMX Farrier Tools website.
- Designed responsive and modern user interfaces aligned with business requirements.
- Optimized website performance and SEO, improving Google Lighthouse scores from 60 to 94.

Education

Bachelor of Science in Computer Science ***Expected Graduation: May 2027***

University of Engineering and Technology (UET), Lahore

Certifications

- Microsoft Certified: Fabric Data Engineer Associate - Microsoft
- Google Advanced Data Analytics - Google (Coursera)
- Google Business Intelligence - Google (Coursera)
- Generative AI Application Developer - Pak Angels / ULEFUSA
